 New Features / Enhancements.....2
 Fixes / Improvements.....2

Version History

Infolinx release notes provide information on the new features, improvements, and fixes in each release.

Version	Approved By	Effective Date	Description of Change
3.7.0	Alex Caldas	05/08/2020	Created for Infolinx Version 3.7

Release 3.7.0

New Features / Enhancements

Infolinx JIRA ID	Description
	Conditional Field Display
INFOLINXW-4188	New feature allowing to hide/unhide fields at the item type level based on list values selected from the picklist. Currently, for each item type, all fields display when creating/updating records. This new feature will allow to configure fields specific to list values and display only when specific list value is selected. NOTE: This feature is only applicable on Create and Update page.
	Electronic Signature with SSO (Single Sign On)
INFOLINXW-4222	Enable electronic signature to validate credentials for SSO solution.

Fixes / Improvements
